

## Project News :

### Shade Umbrella offers Cool Comfort

Guilford Park Pre-School in Greensboro, NC is excited about their new BreezeBrella for their playground. The school wanted to protect their children from the hot NC sun and provide a cool place for students and staff to enjoy the outdoors! The umbrella matches existing play equipment perfectly.

This structure is Wind Rated for 170 mph with cover off and 120 mph wind load with cover on.

These durable, permanent shade structures have a fixed center column that eliminates unnecessary perimeter posts that can become obstacles. BreezeBrellas are ideal for playgrounds, sandboxes, outdoor dining and seating areas, aquatic/pool areas and picnic areas. They are offered in two different styles - 6-sided hexagons and 4-sided squares. They are offered in an array of sizes and colors to meet your specific needs.

**Carolina Shade Sails** offers pre-fabricated structures that are striking and economical fabric shelters. If you are looking to provide more usable and inviting outdoor space, we have some ideas!  
**Review our web site to get design ideas for your next project.**

Call for more information on how we can help you provide an inviting outdoor space, protection from the sun or add an architectural element to your property.
