Features & Benefits

- ☀ Sunguard Shade Cloth® provides up to 96% UV protection
- ☀ HDPE (high density polyethylene) shade cloth with Ultra Violet (UV) additives
- ☀ Breathable shade cloth lowers ambient temperatures up to 20 degrees
- ☀ Fade, rot and mildew resistant
- ☀ 80% water repellent (note: waterproof fabric is available in limited colors)
- ☀ Holds up to 5 lbs. snow load, 10 lbs. live load
- ☀ Fire Safety— passes the ASTM E-84 fire rating, NFPA 255 & NFPA 701
- ☀ PTFE (polymer) thread lock stitch
- ☀ Tensile strength is 296 lbs. warp and 306 lbs. weft
- ☀ Raschel Knitted for durability with reinforced corners
- ☀ Available in 19 vibrant colors

Technical Specifications

Sunguard Shade Cloth® is a three bar knitted, lock-stitch Z pattern, incorporating one monofilament and two tape yarns for dimensional stability and tear and fray resistance.

The Z pattern gives excellent weft and warp stability, due to extended throw of the weft yarns across the knitting needles during manufacture.

The weft tape yarns incorporated in the Z pattern design provides up to 96% UV block out, as well as exceptional water run-off properties.

The Sunguard Shade Cloth® fabric is heat set using a tentering process, giving additional dimensional stability and strength as a result of shrinking the knots and equalizing yarn lengths.

The tentering of the Sunguard Shade Cloth® fabric assists in eliminating sagging and looseness in the fabric after installation.
